Software Requirement Specification (SRS)

Project: Desun Academy Learn & Earn Contest Platform

---

1. Introduction

1.1 Purpose

This document defines the requirements for the Desun Academy Contest Platform. The platform enables students to participate in real client-based contests, submit their work, and earn rewards while learning.

1.2 Scope

The system will allow:

- Admin to create and manage contests
- Students to register, participate, and submit projects
- Admin to evaluate submissions and declare winners
- Tracking of performance, submissions, and rewards

---

2. Overall Description

2.1 Product Perspective

This is a web-based application built using the MERN stack:

- MongoDB (Database)
- Express.js (Backend Framework)
- React.js (Frontend)
- Node.js (Server)

- Node.js (Server)

2.2 User Classes

Admin

I

- Create contests
- Assign projects
- Review submissions
- Declare winners
- Manage users

Student

- Register/Login
- View contests
- Participate in contests
- Submit projects
- Track results and earnings

- Submit projects
- Track results and earnings

---

3. Functional Requirements

3.1 Authentication System

- Users can register (Student/Admin)
- Login using email & password
- JWT-based authentication

3.2 Contest Management (Admin)

- Create Contest
  - Title
  - Description
  - Project Brief
  - Difficulty Level
  - Deadline
  - Rewards
- Edit/Delete Contest
- View all participants

3.3 Contest Participation (Student)

Help

3.2 Contest Management (Admin)

- Create Contest
  - Title
  - Description
  - Project Brief
  - Difficulty Level
  - Deadline
  - Rewards
- Edit/Delete Contest
- View all participants

3.3 Contest Participation (Student)

- View list of active contests
- View contest details
- Click "Participate"
- Status changes to "Registered"

3.4 Submission System

- Students submit:
  - Project Title
  - Description
  - GitHub Link
  - Live URL
- Submission deadline validation
- Only one submission allowed (or configurable)

3.5 Evaluation System (Admin)

- View all submissions per contest
- Score based on:
  - Quality
  - Creativity
  - Completion
  - Usability
- Add remarks

3.6 Winner Declaration

- Admin selects winners:
  - 1st, 2nd, 3rd
- System marks winners

3.6 Winner Declaration

- Admin selects winners:
  - 1st, 2nd, 3rd
- System marks winners
- Display leaderboard

3.7 Dashboard

Admin Dashboard

- Total contests
- Total participants
- Submissions overview
- Pending evaluations

Student Dashboard

- Participated contests
- Submission status
- Scores
- Earnings

4. Non-Functional Requirements

4.1 Performance

- Should support 500+ concurrent users initially

4.2 Security

- JWT authentication
- Password hashing (bcrypt)
- Role-based access control

4.3 Usability

- Mobile responsive UI
- Simple navigation

4.4 Scalability

- Modular backend (REST APIs)
- Can be extended to mobile app

---

6. API Endpoints (Sample)

Auth

- POST /api/register

6. API Endpoints (Sample)

Auth

- POST /api/register
- POST /api/login

Contest

- POST /api/contest (Admin)
- GET /api/contests
- GET /api/contest/:id

Participation

- POST /api/contest/:id/participate

Submission

- POST /api/contest/:id/submit

Submission

- POST /api/contest/:id/submit

- GET /api/submissions/:contestId

Evaluation

- POST /api/submission/:id/evaluate

---

7. Future Enhancements

- Wallet system (earnings tracking)
- Leaderboard with rankings
- Team-based contests
- Client integration (real project uploads)
- AI-based evaluation assistance

I

- GET /api/submissions/:contestId

Evaluation

- POST /api/submission/:id/evaluate

---

7. Future Enhancements

- Wallet system (earnings tracking)
- Leaderboard with rankings
- Team-based contests
- Client integration (real project uploads)
- AI-based evaluation assistance

---

8. Conclusion

This platform will act as a bridge between learning and real-world execution, enabling students to gain hands-on experience while earning. It also builds a scalable talent ecosystem for Desun Academy
